DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 line 12, "the inner circumferential surface of both end" is vague and indefinite since the geometry of the fixing member is not clearly given.

Line 13, it is not clear what "fixedly rotates" is meant.

Lines 20-21, "the left land right rectilinear movement" is not understood.

In claim 2, lines 2-3, "each outer circumstantial surface of the fixing member" is confusing. "each... of the fixing member" suggests more than one surface. It is unclear how many circumstantial surface there are.

Claims 3-5 are vague and indefinite since the claims are hypothetical and contain no positive structure.

Art Unit: 3676

In claim 11, lines 4 and 5, it is not understood what "each of the plurality of doors" or "the auxiliary support" is referring to.

Page 3

In both claims 13 and 14, it cannot be understood how the "plurality of rotating members" are structurally related to the "plurality of rotating member" in claim 1.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Application/Control Number: 10/796,081 Page 4

Art Unit: 3676

4. Claims 1-8, 10-12 and 14 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by KR 2003060759A (Pub-Date July 16, 2003).

KR has an upper receptacle 210, a lower receptacle 110, a fixing member 220, rotating members 120, elastic members 123, a shaft 310a and 310b, couplers 212, 221, 122, 112, and fixing caps 330. Note that "integrally formed" is sufficient broad to embrace constructions united by fastening and welding.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over KR '759 in view of Chang (6,286,187).
 - KR discloses the invention as claimed but for the oil groove in the rotating member. Chang teaches a hinge having grooves (133) formed on the rotating member for retaining grease. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the rotating member of KR with grooves for retaining grease.
- 7. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over KR '759. KR does not show a plurality of upper hinge receptacles. However, KR has a plurality of lower receptacles (111a, 111b), and one upper receptacle (210). It

Application/Control Number: 10/796,081 Page 5

Art Unit: 3676

would have been obvious to one having ordinary skill in the art at the time the invention was made to reverse the location of the upper and lower receptacles, since it has been held that a mere reversal of the essential working parts of a device involves only routine skill in the art. *In re Einstein*, 8 USPQ 167.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Chuck Mah whose telephone number is (571)272-7059. The examiner can normally be reached on 5/4-9.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Shackelford can be reached on (571)272-7049. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
